

Spinner Knobs Driving Aids

ACE Mobility is proud to present the new **Spinner Knobs** line. Available in two sizes mushroom style and round ball design. Drivers can choose the one shape and size of knob to fit their abilities and comfortable grip.

Our **Spinner Knobs** are specifically designed for drivers with disabilities that experience difficulty steering the wheel. It is also very popular among truck drivers as it helps to reduce tension, making long drives easier.

The Spinner Knob options are:

- 1.8" (46 mm) Round ball design knob
- 1.7" (44mm) Mushroom style knob
- 2" (50mm) Mushroom style knob

The Spinner Knob kit includes:

- Duroplast knob switch stainless steel axle
- Super strong Acetal **BandBase** with quick release button
- Two stainless steel bands with unique banding feature
- Bolts & Nuts

ACE Mobility **BandBase** easily mounted at any position on the wheel for left and right-hand drivers. With unique banding feature it lifts almost all steering wheels shape and size. It has a very strong grip tension when mounted on the steering wheel, but leaves very little marks on the steering wheel when disassembled. The spinner knob can very easily be removed by simply pressing the Quick Release button and pushing the spinner knob out.
