

## Petite Wheeled Walker

Soft touch braking mechanism

Height adjustable handles (715-850mm)

Lightweight alloy with tube-in-tube construction for increased strength

Compact fold down design

153 mm (6 inch) castors

Durable moulded orthopedic handgrip

Foam backrest

Moulded seamless seat with concealed PVC seat pouch

Removable basket and bag

Ideal for people shorter than 166 cm (5'5")

With lower overall height range and seat height, the Petite Wheeled Walker is ideally suited for users 166cm (5'5") or less.

The alloy frame makes this wheeled walker especially lightweight, while the tube-in-tube construction significantly increases stability and durability.

Recommended for general indoor use, six inch castors ensure easy operation and manoeuvrability on smooth surfaces and through doorways.

The durable moulded handgrips with soft touch brakes are ideal for people with limited strength or mobility; maximising user comfort by minimising pressure on the hand. Handle height can be adjusted easily to best suit the user, with an extension range of 135 mm to suit users with a more petite stature.

The fully moulded PU seat is completely seamless, reducing the potential for skin tear or abrasion, plus foam backrest for added comfort when seated.

Cleverly concealed beneath the seat is a PVC pouch, offering additional security for small personal valuables.

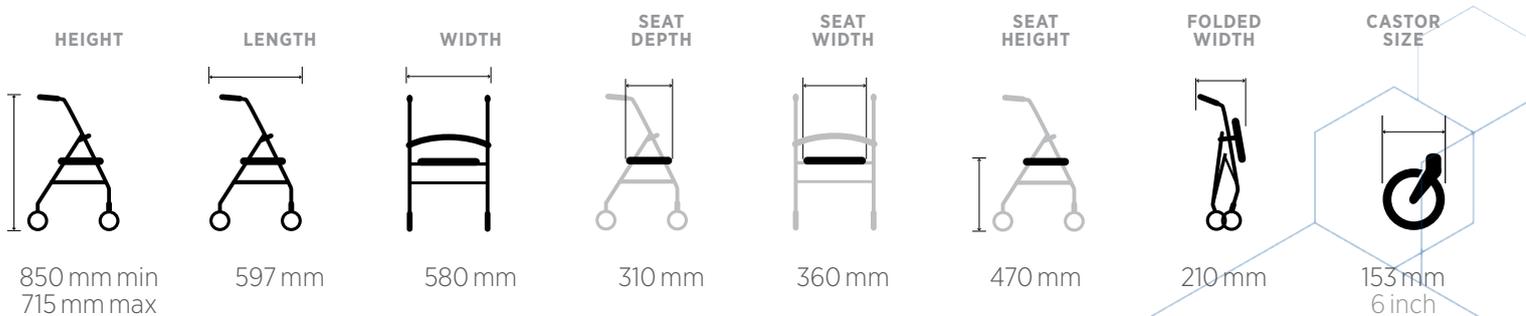

# Petite Wheeled Walker

With the added convenience of both basket and bag that can be used together (basket fits inside the bag to conceal contents) or individually. Both items are removable, for the security and transport of goods when leaving the wheeled walker unattended.

Easy closing mechanism and compact fold down design for convenient transport or storage.
