OUR GUARANTEE: All products supplied with full warranty and guaranteed to be free from defects in material and workmanship.

One of the most cost effective solutions on the market today.

# Seizure Alert

The cura1 Seizure Alert System integrates multiple monitoring functions into a single compact device. The system detects the shaking and jerking movements associated with convulsive seizures, as well as detecting sounds of possible distress.

The unit sends a signal to a third party alarm or an (optional) wireless remote alarm system.

## Detect and raise an alarm when a seizure occurs.

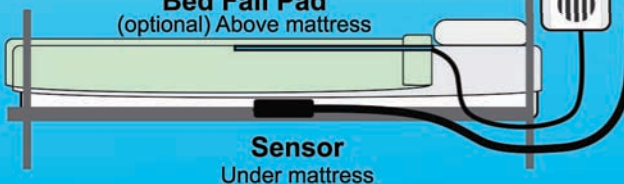

Wireless Remote Alarm (Optional)

SeizureAlert Monitor

To 3rd party alarm device eg. nurse call system

Bed Fall Pad (optional) Above mattress

Sensor Under mattress
