

Mobility Scooter & Power Wheelchair Trailers

Make transporting your scooter or powerchair easy with our ultra-low, lightweight enclosed trailers.

Built To Last

Galvanised chassis and composite body are lightweight, strong and long lasting.

Australian Made

Designed and made in-house by Carbon Equipment using the best Australian materials

Small Trailer

Best for power wheelchairs and small mobility scooters.

Dimensions: 1.5 x 1.0m
Tare Weight: 200kg
Payload: 200kg
Ramp Angle: 1:7.5
\$12,990 inc. GST

Large Trailer

Best for large mobility scooters and additional space.

Dimensions: 2.0 x 1.2m
Tare Weight: 300kg
Payload: 300kg
Ramp Angle: 1:9
MADE TO ORDER

Easy Access

Designed from the ground up for the easiest access for loading powerchairs and mobility scooters. Featuring our in-house developed UniTor suspension for an extra low deck height, coupled with a full height composite ramp, results in the lowest ramp angle for easy loading and unloading.

Fully Enclosed Body

Keep your scooter or powerchair clean and dry with our fully enclosed composite body. It will look great for years to come and is easy to use with no zips or canvas to deal with. The small trailer body hinges forward for easy access, while the large size is tall enough to stand in.

Customisable

Everybody's needs are different and by buying from an Australian manufacturer we can customise your trailer to suit your individual requirements. Whether that's a winch, automation or a custom tie-down solution, our in-house engineering team can find a solution for your needs.
